CP-PWR-CUBE-3=	IP Phone power transformer for the 7900 phone series	41
CP-PWR-CORD-AP=	7900 Series Asia Pacific Power Cord	41

Correction #2

Ref Sec F Page : 25

Detailed technical spec of **1.5 KVA Isolation Transformer**

Point 8c

As mentioned in the tender document	Should be read as
The out put to be available in 2 steps 1:1.0 and 1:1.2 The steps are to be routed to the output socket via a selector toggle switch to be located at the back of the chassis.	The out put to be available in 2 steps 1:1.0 and 1:1.1 The steps are to be routed to the output socket via a selector toggle switch to be located at the back of the chassis

Addendum #1

The bidder has to arrange for Raw power to be drawn from designated Building mains at some of the locations. The power is to be routed through a 16 A Dual pole MCB and terminated on a 5 /15A Plug from where the UPS input power is to be taken. The power cables should be 2 copper cable of 4.0 Sq mm multistrand with ISI certification for Phase and neutral and 2.5 sqmm multistrand cable for Earth. The cable has to be laid through suitable casing.

Bidder to quote in the following manner

Sl no	Item description	S.T./VAT	Unit cost
1.	Material cost for MCB,5/15 A Plug point with back box per location		
2	Laying charge for above		
3	Material cost per meter of composite power cable 2noX 4 Sqmm cable + 1noX 2.5 Sqmm cable		
4	Laying charge for above		

Bidder will be paid on actual Power cabling done based on the price quoted in above table.

*For **bid evaluation** power cabling at all 41 locations will be considered @ 15 meter of cabling per location. However the bidder will have to execute the power cabling only where needed and will be paid at actuals*
