## **ABOUT MILLENNIUM BUSINESS SOLUTIONS INDIA**

Millennium Business Solutions India was established in 2005 as a Healthcare IT service company in Eastern India. It is the India Operation Centre of Millennium Business Solutions located in Columbus, Ohio, USA. The corporate headquarters of the company is located in Kolkata, India and they are one of the largest Medical Transcription companies in Eastern India having a state-of-the-art Production unit and Training Centre in Medical Transcription and Software Development.

## **ABOUT WEBEL**

Webel is the nodal agency of the Government of West Bengal for developing Information Technology and ITES industries in the State and creating value for the citizens. Webel facilitates the growth of the industry by a host of measures such as developing infrastructure in the form of land/building for the investors and facilitating processes of clearances that are required to set up business, ensures last mile connectivity, assists the government in all its e-governance projects and brings tangible benefits to citizens in the field of health care and IT education. Webel acts as the single window support centre for all services required by the IT & ITES investors in the state of West Bengal.

## **WEBEL-MBS SCHOOL OF HEALTHCARE**

Webel –MBS School of Healthcare is a Training Centre of Excellence with state-of-the-art Technology and Training tools and modules backed by real world Healthcare expertise. The main goal of Webel-MBS School of Healthcare Training Program is to prepare students for a dignified and upgraded level of employment as Healthcare and ITES professionals. This can be achieved through effective training on basic fundamental knowledge which enhances understanding and skills required for the industry.

## **WHAT IS HEALTHCARE INFORMATION TECHNICIAN**

As the healthcare industry becomes more computer-based, the need for qualified healthcare technicians is increasing significantly. Currently, most of the Physicians' Offices, Nursing Homes and Hospitals rely on storing patient care data manually in paper form. The current U.S. Government has strongly encouraged these institutions to convert them into electronic media and has also provided incentives as well as set deadline dates for such appropriate conversion. This trend is impacting the Indian health sector also, which has recently seen strong indications of migrating towards electronic medical records. Computerizing the medical industry will require methodical categorization of patient data and entering them in a format that can be easily retrieved later for detailed analysis and trending. Such functions require comprehensive education and training, as will be provided by the Healthcare Information Technician Training course.

## **INDUSTRY PROSPECTS**

Healthcare Information Technician course is a program that will provide training on detailed patient care data analysis and equip the course graduates with the requisite knowledge to be effective in that domain. Over the next few years, healthcare organizations, big and small, will convert into electronic media for storing patient data and will require staff in large numbers to be part of this migrating process. Therefore, the need for such qualified technicians will far outweigh the available personnel in this field. Course graduates will find ample job opportunities in health organizations of various sizes, both for companies receiving outsourcing work from US as well as domestic organizations. Healthcare Information Technician graduates are expected to earn a monthly salary between Rs. 8000 – Rs. 20000.
